Aesthetic power generation on large carports with our affordable kits

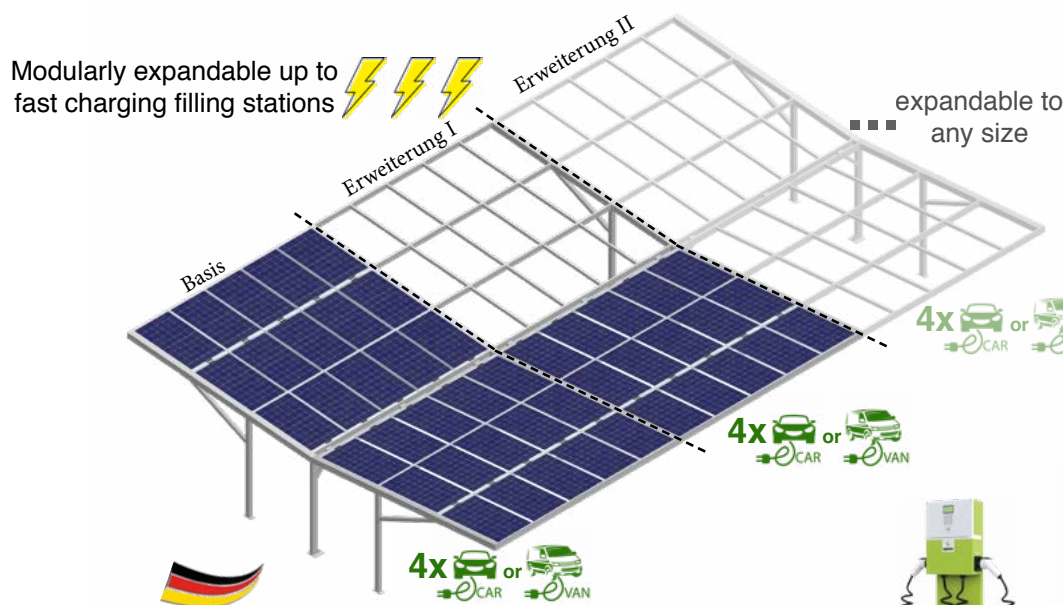

While small carports dominate the offer, large carports are rarely found. This is especially true for those with integrated PV modules. GridParity fills this gap with its kits, which can be ordered flexibly in height. With a width of up to 7m they offer enough space even for large campers and delivery vehicles. The kit consists of anodized aluminum profiles with a very high load-bearing capacity so that the construction is also possible in areas with high snow loads. The outer profiles have a height of 20 cm and can only be pressed by the biggest extrusion machines. The advantage of anodized aluminum is the extreme weather resistance combined with the low weight. The heaviest parts weigh less than 70 kg. For this reason and due to the pre-assembled connecting parts, a construction without cranes or other heavy lifting devices is also possible. The PV system consists of bifacial modules with an output of 380 Wp, so that the entire system has a connected load of approx. 7 kWp and produces approx. 7,500 kWh of electricity per year, enough to charge 2 electric vehicles with the optional charging station. High subsidies are possible for the carport and also for the charging components/battery sets.

PV Charging Stations

PV charging station complete with

- Carport (approx. 6 kWp)
- battery (10 kWh)
- optional inverter
- Charging station (22 kW)

  
PV Fast Charger station with

- Carport for 12 vehicles
- approx. 35 kWp PV-power
- inverter
- 2 x double charging station (2x22kW)
- quick charging station (120 kW)
- optional battery (100 kWh)

Hi-Tech „Designed in Germany“ with a 12 year warranty (with hot dip galvanizing)

e-charging station (aluminum, anodized)

e-charging station (steel, hot-dip galvanized)

With the leaves the prices for complete kits fall!

Special offers from stock (2 weeks delivery time) with **P60 (265 Wp) double glass modules** while stocks last. Complete kits including waterproof mounting!

Size approx.: 3,34 x 3,10 x 2,28 x 1,93 m
